Performance Tips

- Optimize images before upload - Use namespaces for organization - Avoid excessive plugin usage - Regular maintenance and updates —-

14. Troubleshooting

Common Issues

| **Problem** | **Solution** | | Page not updating | Use `` or Ctrl+F5 | | Images not displaying | Check file path and permissions | | Syntax not working | Verify plugin activation | | PHP errors | Check PHP version compatibility | | Plugin conflicts | Disable plugins individually |

Browser Compatibility

- **Modern browsers:** Full support - **Mobile devices:** Responsive design - **Accessibility:** Screen reader compatible - **Performance:** Optimized for speed

Debug Strategies

1. Check browser console for errors 2. Verify plugin compatibility 3. Test with minimal content 4. Use DokuWiki debug mode 5. Check server logs —-

15. Best Practices

Content Organization

- Use logical heading hierarchy - Implement consistent naming conventions - Organize media in folders - Regular content reviews

Accessibility

- Provide alt-text for images - Use descriptive link text - Maintain proper heading structure - Test with screen readers

Security

- Keep DokuWiki updated - Use strong authentication - Review ACL settings regularly - Monitor for suspicious activity

Performance

- Optimize images and media - Use caching effectively - Minimize plugin usage - Regular maintenance —-

16. Advanced Features

Namespaces

``` page page ```

Anchors

``` Link to section ```

Interwiki Links

``` wiki Wikipedia search term ```

Include Pages

``` namespace:page ``` —-
