Unified Save Function Test

Testing the unified `dokuwiki_save_page` function for:

- **Auto mode detection** (create vs update)
- **Content preservation**
- **Summary handling**

Initial Creation

This page demonstrates the unified save functionality.

Update Test

☐ **AUTO MODE UPDATE SUCCESS!**

This section was added via second `dokuwiki_save_page` call in auto mode, proving the function correctly detected existing page and performed update operation.

Performance: Seamless create→update detection
